# Source to Pay Platform BPO

- Is your global presence making your procurement processes increasingly complex?

- Do you have to deal with multiple vendors for each department in various locations?

- Is your business grappling with the shortage of skilled resources and extensive manual processing using legacy IT systems?

Procurement Outsourcing – a vital tool to reduce the cost of purchasing goods and services – is being increasingly used by organizations to better manage corporate spend.

Infosys' Source-to-Pay platform BPO offers a new business model delivering the end-to-end indirect procurement process as 'Service-In-A-Box'. By unifying process outsourcing with technology, it provides

an integrated offering to manage indirect spend in the Source-To-Pay life-cycle. Infosys' Platform BPO provides immediate benefits to an organization such as enhanced spend visibility and reduction in fragmented spending.

Source to Pay Platform BPO

The Source-to-Pay Platform BPO solution is based on managing the Source-to-Pay cycle for indirect spend categories. Infosys sourcing experts helps in improving procurement process. Processes are executed using Infosys BPO team integrated with our provisioned application and infrastructure resources.

The software application is powered by ERP application at the core and enhanced by niche applications and Infosys' tools and accelerators. The solution is backed by scalable and reliable hardware housed in a state-of-the-art datacenter.

Solution Description

The figure above traces Infosys' role in the entire procurement process. After initiation of purchase request by client users, Infosys executes the entire range of processes from managing requests to purchase order generation, following goods shipment, Invoice processing, and vendor payments. Clients can access the system for approvals and other tasks as required besides leveraging value added services such as analytics and supplier performance management.

Solution Features

- Integrated offering to efficiently manage indirect spends through the source-to-pay life-cycle

- Pricing model provides predictable periodic spend aligned with business cycle

- Quick deployment, pre- configured solution to meet standard requirements

- Based on Shared Services framework with data security and integrity

Client Profile

- Complex vendor management challenges with multiple vendors and minimal standardization across procurement processes

- Legacy IT systems for procurement with extensive manual processing

- Absence of centralized global data source resulting in reduced spend visibility and predictability in procurement process
