Independent Auditor's Report

To

The Members of Infosys BPO Limited

Report on the Financial Statements

We have audited the accompanying financial statements of Infosys BPO Limited ('the Company') which comprise the Balance Sheet as at 31 March 2013, the Statement of Profit and Loss and the Cash Flow Statement for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the Accounting Standards referred to in sub-section (3C) of section 211 of the Companies Act, 1956 ("the Act"). This responsibility includes the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

(i) in the case of the Balance Sheet, of the state of affairs of the Company as at 31 March 2013;

(ii) in the case of the Statement of Profit and Loss, of the profit for the year ended on that date; and

(iii) in the case of the Cash Flow Statement, of the cash flows for the year ended on that date.

Report on Other Legal and Regulatory Requirements

1. As required by the Companies (Auditor's Report) Order, 2003 ("the Order") issued by the Central Government of India in terms of sub-section (4A) of section 227 of the Act, we give in the Annexure a statement on the matters specified in paragraphs 4 and 5 of the Order.
2. As required by section 227(3) of the Act, we report that:
   a. we have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
   b. in our opinion proper books of account as required by law have been kept by the Company so far as appears from our examination of those books;
   c. the Balance Sheet, Statement of Profit and Loss and Cash Flow Statement dealt with by this Report are in agreement with the books of account;
   d. in our opinion, the Balance Sheet, Statement of Profit and Loss and Cash Flow Statement comply with the Accounting Standards referred to in subsection (3C) of section 211 of the Companies Act, 1956; and
   e. on the basis of written representations received from the directors as on 31 March 2013, and taken on record by the Board of Directors, none of the directors is disqualified as on 31 March 2013, from being appointed as a director in terms of clause (g) of sub-section (1) of section 274 of the Companies Act, 1956.

ANNEXURE TO THE AUDITORS' REPORT

The Annexure referred to in our report to the members of Infosys BPO Limited (‘the Company’) for the year ended 31 March 2013. We report that:

(i) (a) The Company has maintained proper records showing full particulars, including quantitative details and situation of fixed assets.

(b) The Company has a regular programme of physical verification of its fixed assets by which all fixed assets are verified during the year. In our opinion, this periodicity of physical verification is reasonable having regard to the size of the Company and the nature of its assets. No material discrepancies were noticed on such verification.

(c) Fixed assets disposed off during the year were not substantial, and therefore, do not affect the going concern assumption.

(ii) The Company is a service company, primarily rendering business process management services. Accordingly, it does not hold any physical inventories. Thus, paragraph 4(ii) of the Order is not applicable.

(iii) The Company has neither granted nor taken any loans, secured or unsecured, to or from companies, firms or other parties covered in the register maintained under section 301 of the Companies Act, 1956.

(iv) In our opinion and according to the information and explanations given to us, there is an adequate internal control system commensurate with the size of the Company and the nature of its business with regard to purchase of fixed assets and sale of services. The activities of the Company do not involve purchase of inventory and the sale of goods. We have not observed any major weakness in the internal control system during the course of the audit.

(v) (a) In our opinion and according to the information and explanations given to us, the particulars of contracts or arrangements referred to in section 301 of the Act have been entered in the register required to be maintained under that section.

(b) In our opinion, and according to the information and explanations given to us, the transactions made in pursuance of contracts and arrangements referred to in (v)(a) above and exceeding the value of Rs 5 lakh with any party during the year have been made at prices which are reasonable having regard to the prevailing market prices at the relevant time.

(vi) The Company has not accepted any deposits from the public.

(vii) In our opinion, the Company has an internal audit system commensurate with the size and the nature of its business.

(viii) The Central Government of India has not prescribed the maintenance of cost records under Section 209(1)(d) of the Act for any of the services rendered by the Company.

(ix) (a) According to the information and explanations given to us and on the basis of our examination of the records of the Company, amounts deducted/ accrued in the books of account in respect of undisputed statutory dues including Provident Fund, Employees’ State Insurance, Income-tax, Sales-tax, Wealth tax, Service tax and other material statutory dues have been regularly deposited during the year by the Company with the appropriate authorities. As explained to us, the Company did not have any dues on account of Investor Education and Protection Fund, Customs duty and Excise duty.

According to the information and explanations given to us, no undisputed amounts payable in respect of Provident Fund, Income-tax, Employees’ State Insurance, Sales-tax, Wealth tax, Service tax and other material statutory dues were in arrears as at 31 March 2013 for a period of more than six months from the date they became payable.

(b) According to the information and explanations given to us, there are no dues of Sales tax, Wealth tax and Cess which have not been deposited with the appropriate authorities on account of any dispute. However, according to information and explanations given to us, the following dues of Income tax and Service tax have not been deposited by the Company on account of disputes:

Name of the statute	**Nature of dues demanded**	**Amount demanded (Rs.)**	**Period to which the amount relates**	**Forum where dispute is pending**
Income Tax Act, 1961	Interest/ Tax Demands	4,502,275	AY 2006-07	Deputy Commissioner Income Tax, Bangalore
Income Tax Act, 1961	Interest/ Tax Demands	179,055*	AY 2010-11	Deputy Commissioner Income Tax, Bangalore
Income Tax Act, 1961	Tax deducted at source	11,912,344**	AY 2009-10	Commissioner of Income Tax(Appeals), Bangalore
Income Tax Act, 1961	Tax deducted at source	8,324,020	AY 2012-13	Assistant Commissioner of Income Tax(TDS), Bangalore
Income Tax Act, 1961	Tax deducted at source	194,910	AY 2011-12	Assistant Commissioner of Income Tax(TDS), Bangalore
Finance Act, 1994	Service tax demands/ Penalties	379,826,474	April 2007 to September 2010	Central Excise Service Tax Appellate Tribunal
Finance Act, 1994	Service tax demands/ Penalties	55,405,040	January 2005 to March 2007	Central Excise Service Tax Appellate Tribunal
Finance Act, 1994	Service tax demands/ Penalties	76,415,315	October 2010 to September 2011	Central Excise Service Tax Appellate Tribunal

*net of amounts paid Rs 8,890,900
**net of amounts paid of Rs 17,014,316

(x) The Company does not have any accumulated losses at the end of the financial year and has not incurred cash losses in the financial year and in the immediately preceding financial year.

(xi) The Company did not have any outstanding dues to any financial institution, banks or debentureholders during the year.

(xii) The Company has not granted any loans and advances on the basis of security by way of pledge of shares, debentures and other securities.

(xiii) In our opinion and according to the information and explanations given to us, the Company is not a chit fund/ nidhi/ mutual benefit fund/ society.

(xiv) According to the information and explanations given to us, the Company is not dealing or trading in shares, securities, debentures and other investments.

(xv) According to the information and explanations given to us, the Company has not given any guarantee for loans taken by others from banks or financial institutions.

(xvi) The Company did not have any term loans outstanding during the year.

(xvii) The Company has not raised any funds on short-term basis.

(xviii) The Company has not made any preferential allotment of shares to parties and companies covered in the register maintained under section 301 of the Act.

(xix) The Company did not have any outstanding debentures during the year.

(xx) The Company has not raised any money by public issues during the year.

(xxi) According to the information and explanations given to us, no material fraud on or by the Company has been noticed or reported during the course of our audit.

Schedules to the financial statements year ended March 31, 2013

Significant accounting policies and notes on accounts

Company overview

Infosys BPO Limited ("Infosys BPO" or "the Company") was incorporated as Progeon Limited on April 3, 2002 to provide business process management services to organizations that outsource their business processes. Infosys BPO is a majority owned and controlled subsidiary of Infosys Limited ("Infosys", NASD NM: INFY). The Company helps clients improve their competitive positioning by managing their business processes in addition to providing increased value. The name of the Company was changed from Progeon Limited to Infosys BPO Limited with effect from August 29, 2006.

1 Significant accounting policies

1.1 Basis of preparation of financial statements

These financial statements are prepared under the historical cost convention, in accordance with Generally Accepted Accounting Principles in India ("GAAP") on an accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises accounting standards as specified in rule 3 of the Companies (Accounting Standards) Rules 2006, and the relevant provisions of the Companies Act, 1956, to the extent applicable. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

1.2 Use of estimates

The preparation of the financial statements in conformity with GAAP requires that the management of the Company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as of the date of the financial statements. Examples of such estimates includes computation of percentage of completion which requires the Company to estimate the efforts expended to date as a proportion of the total efforts to be expended, provision for doubtful debts, future obligations under employee retirement benefit plans, provision for income taxes, provision for service level agreement ("SLA") and the useful lives of fixed assets and intangible assets.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

Revenue recognition

The Company derives its revenues primarily from business process management services, on time-and-material, fixed-price, fixed-time frame and unit-price basis. Revenue on time-and-material contracts is recognized as the related services are rendered and revenue from the end of the last billing to the balance sheet date is recognised as unbilled revenues. Revenue from fixed-price, fixed-time frame contracts, where there is no uncertainity as to measurement and collectibility of consideration, is recognized as per the percentage of completion method. When there is uncertainty as to measurement or ultimate collectability revenue recognition is postponed until such uncertainty is resolved. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Cost and earnings in excess of billings are classified as unbilled revenue while billing in excess of cost and earnings is classified as unearned revenue. Provision for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the current estimates. When the Company receives advances for its services, such amounts are reflected as advance received from clients until all conditions for revenue recognition are met. The Company presents revenues, net of service taxes, and value added taxes in its statement of profit and loss.

The Company accounts for volume discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discount/incentive amount to each of the underlying revenue transactions that result in progress by the customer towards earning the discount/incentive. Also when the level of discount varies with increase in levels of revenue transactions, the Company recognizes the liability based on its estimate of the customer's future purchases if it is probable that the criteria for the discount will not be met, or if the amount thereof cannot be estimated reliably. The Company recognizes changes in the estimated amount of obligation for discount using a cumulative catch-up approach. The discounts are passed on the customer either as direct payments or as a reduction of payments due from customer.

Profit on sale of investment is recorded on the transfer of title from the Company and is determined as the difference between the sale price and the carrying value of the investment. Interest on deployment of surplus funds is recognised using time proportion method, based on underlying interest rates. Dividend income is recognized when the Company's right to receive dividend is established.

1.4 Expenditure

The cost of software user licenses purchased for rendering business process management services is charged to revenue when put to use. Lease under which the Company assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets acquired are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognised as an expense on a straight line basis in the profit and loss account over the lease term.

1.5 Fixed assets, intangible assets and capital work-in-progress

Fixed assets are stated at cost, after reducing accumulated depreciation and impairment upto the date of the balance sheet. Direct costs are capitalized until the assets are ready for use and include financing costs relating to any borrowing attributable to acquisition or construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use. Capital work-in-progress includes the cost of fixed assets that are not yet ready for their intended use. Intangible assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortization and impairment. Goodwill, recorded on amalgamation in the nature of purchase is tested periodically for impairment.

1.6 Depreciation

Depreciation on fixed assets is determined using the straight-line method based on useful lives of assets as estimated by the Company. Depreciation on assets purchased/sold during the period is proportionately charged. Individual assets costing ₹5,000 or less are depreciated within a year of acquisition. Leasehold improvements are written off over the lower of the lease term or the useful life of the asset. Leasehold land is amortised over the lease period. Intangible assets are amortised over their useful life on a straight line basis commencing from the date the asset is available to the Company for its use. Management estimates the useful life for the various fixed assets as follows:

Buildings	Fifteen years
Computer equipment	Two years
Plant and machinery	Five years
Furniture and fixtures	Five years
Office equipment	Five years

1.7 Retirement benefits to employees

1.7a Gratuity

In accordance with the Payment of Gratuity Act, 1972, Infosys BPO provides for gratuity, a defined benefit retirement plan (the "Gratuity Plan") covering all employees. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount based on the respective employee's eligible salary and the tenure of employment. Liabilities with regard to the Gratuity Plan are determined by an actuarial valuation, carried out at the period end by an independent actuary using the projected unit credit method, based upon which Company contributes to the Infosys BPO employees Gratuity Fund Trust (the 'Trust'). The trustee administers contributions made to the Trust and invests the corpus with LIC of India.

The Company recognizes the net obligation of the gratuity plan in the balance sheet as an asset or liability, respectively in accordance with Accounting Standard (AS) 15, “Employee Benefits”. The discount rate is based on the Government securities yield. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are recognised in the profit and loss account in the period in which they arise.

1.7b Superannuation

Certain employees of Infosys BPO are eligible for superannuation benefits. The Company contributes ₹ 100 annually for the superannuation benefits of the employees. The Company has no further obligations to the superannuation plan beyond the yearly contribution to the trust fund, the corpus of which is invested with the LIC of India.

1.7c Provident fund

Eligible employees receive benefits from a provident fund, which is a defined contribution plan. Both the employee and the Company make monthly contributions to this provident fund plan equal to a specified percentage of the covered employee's salary. Amounts collected under the provident fund plan are deposited in a Government administered provident fund. The Company has no further obligations under the provident fund plan beyond its monthly contributions.

1.7d Compensated absences

The employees of the Company are entitled to compensated absences which are both accumulating and non-accumulating in nature. The expected cost of accumulating compensated absences is determined by an actuarial valuation based on the additional amount expected to be paid as a result of the unused entitlement that has accumulated at the Balance Sheet date. Expense on non-accumulating compensated absences is recognised in the period in which the absences occur.

1.8 Foreign currency transactions

Revenue from overseas clients and collections deposited in bank accounts are recorded at the exchange rate as of the date of the respective transactions. Expenditure in foreign currency is accounted at the exchange rate prevalent when such expenditure is incurred. Disbursements made out of bank accounts are reported at a rate that approximates the actual monthly rate. Exchange differences are recorded when the amount actually received on sales or actually paid when expenditure is incurred is converted into Indian rupees. The exchange differences arising on foreign currency transactions are recognized as income or expense in the period in which they arise.

Monetary assets and monetary liabilities denominated in foreign currency are translated at the exchange rate prevalent at the date of the balance sheet. The resulting difference is also recorded in the profit and loss account.

Non-monetary assets & non-monetary liabilities denominated in a foreign currency and measured at fair value are translated at the exchange rate prevalent at the date when the fair value was determined.

1.9 Forward contracts and option contracts in foreign currencies

The Company uses forward contracts and options contracts to hedge its exposure to movements in foreign exchange rates. The use of these forward contracts and option contracts reduces the risk or cost to the Company and the Company does not use the forward contracts and option contracts for trading or speculation purposes.

Effective April 1, 2008, the Company adopted Accounting Standard AS 30 " Financial Instruments: Recognition and Measurement", to the extent that the adoption does not conflict with existing mandatory accounting standards and other authoritative pronouncements, Company law and other regulatory requirements.

Forward and options contracts are fair valued at each reporting date. The Company records the mark to market gain or loss on effective hedges in the foreign currency fluctuation reserve until the transactions are complete. On completion, the gain or loss is transferred to the profit and loss account of that period. To designate a forward contract or option contracts as an effective hedge, management objectively evaluates and evidences with appropriate supporting documents at the inception of each contract whether the contract is effective in achieving offsetting cash flows attributable to the hedged risk. In the absence of a designation as an effective hedge, a gain or loss is recognized in the profit and loss account. Currently the hedges undertaken by the Company are all ineffective in nature and the resultant gain or loss consequent to fair valuation is recognised in the Statement of profit and loss at each reporting date.

1.10 Income tax

Income taxes are computed using the tax effect accounting method, where taxes are accrued in the same period the related revenue and expenses arise. A provision is made for income tax for the period based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable. Minimum Alternative Tax (MAT) paid in accordance with the tax laws, which gives rise to future economic benefits in the form of adjustment of future income tax liability, is considered as an asset if there is convincing evidence that the Company will pay normal tax after the tax holiday period and the resultant asset can be measured reliably. Accordingly, it is recognized as an asset in the balance sheet when it is probable that the future economic benefit associated with it will flow to the Company and the asset can be measured reliably. The Company offsets, on a year on year basis, the current tax assets and liabilities, where it has a legally enforceable right and where it intends to settle such assets and liabilities on a net basis.

The differences that result between the profit considered for income taxes and the profit as per the financial statements are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the differences that originate in one accounting period and reverse in another, based on the tax effect of the aggregate amount being considered. The tax effect is calculated on the accumulated timing differences at the end of an accounting period based on prevailing enacted or substantively enacted regulations. Deferred tax assets in situation of unabsorbed depreciation and carry forward business losses exist, are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets, other than in situation of unabsorbed depreciation and carry forward business losses are recognized only if there is reasonable certainty that they will be realized. Deferred tax assets are reviewed for the appropriateness of their respective carrying values at each balance sheet date. Deferred tax assets and deferred tax liabilities have been offset wherever the Company has a legally enforceable right to set off current tax assets against current tax liablities and where the deferred tax assets and deferred tax liablilities relate to income taxes levied by the same taxation authority.

1.11 Provisions and contingent liability

The Company recognises a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a present obligation that cannot be estimated reliably or a possible or present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are made for all known losses and liabilities and future unforeseeable factors that may affect the profit on fixed-price business process management contracts.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event based on a reliable estimate of such obligation. The provision is measured at the lower of the expected cost of terminating the contract & the expected cost of fulfilling the contract.

1.12 Impairment of assets

Management periodically assesses using, external and internal sources, whether there is an indication that an asset (including goodwill) may be impaired. An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset’s net selling price and value in use i.e. the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

1.13 Earnings per share

In determining earnings per share, the Company considers the net profit after tax. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the year. Diluted earnings per share are computed using the weighted average number of basic and dilutive common equivalent shares outstanding during the year, except where the result would be anti-dilutive. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date.

1.14 Investments

Trade investments are investments made to enhance the Company's business interests. Investments are either classified as current or long-term based on the management's intention at the time of purchase. Current investments are carried at the lower of cost and fair value, determined on an individual investment basis. Cost for overseas investments comprises the Indian Rupee value of the consideration paid for the investment. Long-term investments are carried at cost and provisions recorded to recognize any diminution, other than temporary, in the carrying value of each investment.

1.15 Cash and Cash Equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks and corporations. The Company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

1.16 Cash Flow Statement

Cash flows are reported using the Indirect method, whereby profit before tax is adjusted for the effects of transactions of a non - cash nature and any deferrals or accruals of past or future cash receipts or payments. The cash flows from operating, financing and investing activities of the Company are segregated. Cash flows in foreign currency are accounted at average monthly exchange rates that approximate the actual rates of exchange prevailing at the date of the transaction.

1.17 Employee stock options

The Company applies the intrinsic value-based method of accounting prescribed by Accounting Research Committee of the Institute of Chartered Accountants of India, Accounting for employee share based payments, to account for its fixed plan stock options. Under this method, compensation expense is recorded on the date of grant only if the current market price of the underlying stock exceeds the exercise price. The options vest on a graded basis; however there is no compensation expense since the grants are made at exercise prices equal to or greater than fair market value, as of the date of the grant.

2 NOTES ON ACCOUNTS FOR THE YEAR ENDED MARCH 31, 2013

2.1 SHARE CAPITAL

(in ₹)

Particulars	As at March 31, 2013	As at March 31, 2012
AUTHORISED		
Equity shares, ₹10 (₹10) par value	123,37,50,000	123,37,50,000
12,33,75,000 (12,33,75,000) equity shares		
	123,37,50,000	123,37,50,000
ISSUED, SUBSCRIBED AND PAID UP		
Equity shares, ₹10 (₹10) par value		
3,38,27,751 (3,38,27,751) equity shares fully paid up	33,82,77,510	33,82,77,510
[Of the above, 3,38,22,319 (3,38,22,319) equity shares are held by the holding Company, Infosys Limited]		
	33,82,77,510	**33,82,77,510**

The Company has only one class of shares referred to as equity shares having a par value₹10. Each holder of one equity share is entitled to one vote per share.

In the event of liquidation of the Company, the holders of shares shall be entitled to receive any of the remaining assets of the Company, after distribution of all preferential amounts. However, no such preferential amounts exist currently. The amount distributed will be in proportion to the number of equity shares held by the shareholders.

Reconciliation of the number of shares outstanding

Particulars	As at March 31, 2013	As at March 31, 2012
Number of share outstanding at the beginning of the year	3,38,27,751	3,38,27,751
Add: Shares issued during the year	-	-
Number of shares outstanding at the end of the year	3,38,27,751	3,38,27,751

Shares held by shareholders holding more than 5% shares

Name of the shareholder	Number of shares as at		Percentage of total shares	
	March 31, 2013	March 31, 2012	March 31, 2013	March 31, 2012
Infosys Limited	3,38,22,319	3,38,22,319	99.98%	99.98%

There has been no buy-back of shares, issuance of bonus shares or shares issued for consideration other than cash during the last 5 years.

Employee stock option plan

Guidance note on "Accounting for employee share based payments" (the guidance note) issued by Institute of Chartered Accountants of India establishes financial accounting and reporting principles for employee share based payment plans. The guidance note applies to employee share based payment plans, the grant date in respect of which falls on or after April 1, 2005.

The Company applies the intrinsic value-based method of accounting to account for its fixed plan stock options. Under this method, compensation expense is recorded on the date of grant only if the current market price of the underlying stock exceeded the exercise price on this date. The options vest on a graded basis; however there is no compensation expense since the grants are made at exercise prices equal to or greater than fair market value, as of the date of the grant.

Infosys BPO Employee Stock Option Plan 2002

The Company's 2002 Plan provides for the grant of stock options to employees of the Company and was approved by the Board of Directors and shareholders in June 2002. All options under the 2002 Plan are exercisable for equity shares. The 2002 Plan is administered by a Compensation Committee comprising three members, all of whom are directors of the Company. The 2002 Plan provides for the issue of 52,50,000 equity shares to employees, at an exercise price, which shall not be less than the Fair Market Value ("FMV") on the date of grant. Options may also be issued to employees at exercise prices that are less than the FMV only if specifically approved by the members of the Company in general meeting. Options granted under the 2002 plan vests over 1-6 years.

On March 12, 2007, Infosys Limited purchased 12,19,532 unvested options held by the employees of Infosys BPO Limited for a cash consideration of ₹ 57.87 crore. As at March 31, 2013, nil (March 31,2012:4,76,250) options are held by Infosys Limited. Options held by Infosys Limited cannot be exercised due to legal restrictions and will expire in due course. Accordingly these options have not been considered while computing dilutive earnings per share of the Company from the date Infosys Limited owned these options.

Particulars	Year ended March 31, 2013 Shares arising out of options	Weighted average exercise prices (in ₹)

2.3 OTHER LONG-TERM LIABILITIES

(in ₹)

Particulars	As at March 31, 2013	As at March 31, 2012
Accrued salaries and benefits		
Bonus and incentives	3,22,79,649	3,49,02,225
Earnest money deposit received**	20,92,54,500	2,92,54,500
Contingent consideration payable*	23,07,32,500	57,97,89,882
	47,22,66,649	**64,39,46,607**

*On December 4, 2009, Infosys BPO acquired 100% of the voting interests in McCamish Systems LLC (McCamish), a business process solutions provider based in Atlanta, Georgia, in the United States. The business acquisition was concluded by entering into Membership Interest Purchase Agreement for a cash consideration of ₹173 crores and a contingent consideration of ₹67 crores.

The Company has reassessed the contingent consideration payable during the current period, after receiving the revised revenue and net margin projections from McCamish. McCamish has not been able to meet the targets till date for this payment, and as per the revised projections received, it is still not expected to meet the critical future targets, inspite of their acquisition of a business process outsourcing division from the Marsh Inc. Group in the USA. Accordingly, the Company has reduced the liability payable by ₹ 57,57,31,200 with a credit to other income, since it is not considered payable. The liability for contingent consideration payable as at the balance sheet date represents the expected payment to be made by the Company only for the extended payout period.

**Includes dues to subsidiaries & other group companies (refer to note 2.22)

2.4 OTHER CURRENT LIABILITIES

(in ₹)

Particulars	As at March 31, 2013	As at March 31, 2012
Accrued salaries and benefits		
Salaries	47,07,27,190	32,47,02,527

*Includes dues from subsidiaries (refer to note 2.22)

Provision for doubtful debts

Periodically, the Company evaluates all customer dues for collectability. The need for provisions is assessed based on various factors including collectability of specific dues, risk perceptions of the industry in which the customer operates, general economic factors, which could affect the customer's ability to settle. The Company normally provides for debtor dues outstanding for six months or longer from the invoice date, as at the Balance Sheet date. The Company pursues the recovery of the dues, in part or full.

* The company depreciates fixed assets based on estimated useful lives that are lower than those implicit is Schedule XIV of the Companies Act, 1956 Accordingly, the rates of depreciation used by the company are higher than the minimum rates prescribed by the Schedule XIV of the Companies Act, 1956.

2.23 Segment reporting

The Company's operations primarily relate to providing business process management services to organizations that outsource their business processes. Accordingly, revenues represented along industry classes comprise the primary basis of segmental information set out in these financial statements. Secondary segmental reporting is performed on the basis of the geographical location of customers.

The accounting principles consistently used in the preparation of the financial statements are also consistently applied to record income in individual segments. These are set out in the note on significant accounting policies.

Industry segments at the Company primarily comprise customers relating to financial services and insurance (FSI), manufacturing (MFG), enterprises in energy, utilities and telecommunication services (ECS) and retail, logistics, consumer product group, life sciences and health care enterprises (RCL). Revenue and identifiable operating expenses in relation to segments is categorized based on items that are individually identified to those segments while allocated expenditure is categorized in relation to the associated turnover of the segment. Expenses which form a significant component of total expenses are not specifically allocable to specific segments as the underlying services are used interchangeably. These expenses are separately disclosed as "unallocated" and adjusted only against the total income of the Company. The Company believes that it is not practical to provide segment disclosures relating to these costs and expenses, and accordingly these expenses are separately disclosed as unallocated and directly charged against total income. Fixed assets or liabilities contracted have not been identified to any reportable segments, as these are used interchangeably between segments. Accordingly no disclosure relating to total segment assets and liabilities are made.

Geographical segments are segregated based on the location of the customers, or in relation to which the revenue is otherwise recognized.
All direct costs are identified to its respective verticals/geographies on the basis of revenues from the respective verticals/geographies while unallocable cost consists of depreciation only.
Certain expenses such as depreciation, which form a significant component of total expenses, are not specifically allocable to specific segments as the underlying assets are used interchangeably. Management believes that it is not practical to provide segment disclosures relating to those costs and expenses, and accordingly these expenses are separately disclosed as "unallocated" and adjusted against the total income of the Company.
Fixed assets used in the Company's business or liabilities contracted have not identified to any of the reportable segments, as the fixed assets and services are used interchangeably between segments. Accordingly, no disclosure relating to total segment assets and liabilities are made. Geographical information on revenue and industry revenue information is collated based on individual customers invoiced or in relation to which the revenue is otherwise recognized.

2.24 Gratuity Plan

Gratuity is applicable to all permanent and full time employees of the Company. Gratuity paid out is based on last drawn basic salary and dearness allowance at the time of termination or retirement. The scheme takes into account each completed year of service or part thereof in excess of six months. The normal age of retirement is 60 years and the entire contribution is borne by the Company.

The Company recognises actuarial gains and losses as and when these arise. The charge in respect of these gains/losses is taken to the profit and loss account.

Reconciliation of opening and closing balances of the present value of the defined benefit obligation:

To

The Members of Infosys BPO Poland, Sp.z.o.o

Report on the Financial Statements:

We have audited the accompanying financial statement of **Infosys BPO Poland, Sp.z.o.o** (`the Company`) as at 31st, March 2013, the profit and loss account(`Financial Statement`) of the Company for the year ended on that date and a summary of significant accounting policies and other explanatory information.

Management`s Responsibility for the Financial Statements:

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position and financial performance of the Company in accordance with the Accounting Standards referred to in Sub-Section (3C) of Section 211 of the Companies Act, 1956(``the Act``) This responsibility included the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor`s Responsibility:

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit.

Opinion:

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

1) In the case of the balance sheet, of the state of affairs of the Company as at 31st March 2013;
2) In the case of the statement of profit and loss, of the ***profit*** for the year ended on that date;

As required by Section 227(3) of the Act, we report that;

a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
b) In our opinion proper books of account as required by law have been kept by the company so far as appears from our examination of those books;
c) The Balance Sheet and statement of profit and loss account dealt with by this Report are in agreement with the books of accounts;
d) In our opinion, the Balance Sheet and statement of profit and loss account comply with the Accounting Standards referred to in Subsection (3C) of Section 211 of the Companies Act, 1956, and;

Schedules to the financial statements for the year ended March 31, 2013

Significant accounting policies and notes on accounts

Company overview

Infosys BPO Poland Sp.z.o.o is a leading provider of business process management services to organizations that outsource their business processes. Infosys BPO Poland Sp.z.o.o is a majority owned and controlled subsidiary of Infosys BPO Limited. The company leverages the benefits of service delivery globalization, process redesign and technology and thus drives efficiency and cost effectiveness into client's business processes and thereby improve their competitive position by managing their business processes in addition to providing increased value.

1 Significant accounting policies

1.1 Basis of preparation of financial statements

These financial statements are prepared under the historical cost convention, in accordance with Generally Accepted Accounting Principles in India ("GAAP") on accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises accounting standards as specified in rule 3 of the Companies (Accounting Standards) Rules 2006, and the relevant provisions of the Companies Act, 1956 to the extent applicable. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

1.2 Use of estimates

The preparation of the financial statements in conformity with GAAP requires that the management of the company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as of the date of the financial statements. Examples of such estimates includes computation of percentage of completion which requires the company to estimate the efforts expended to date as a proportion of the total efforts to be expended, provision for doubtful debts, future obligations under employee retirement benefit plans, provision for income taxes, provision for SLA and the useful lives of fixed assets and intangible assets.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

1.3 Revenue recognition

The company derives its revenues primarily from business process management services, on time-and-material, fixed-price, fixed-time frame and unit-price basis. Revenue on time-and-material contracts is recognized as the related services are rendered and revenue from the end of the last billing to the balance sheet date is recognised as unbilled revenues.Revenue from fixed-price, fixed-time frame contracts, where there is no uncertainity as to measurement and collectibility of consideration, is recognized as per the percentage of completion method. When there is uncertainty as to measurement or ultimate collectability revenue recognition is postponed until such uncertainty is resolved. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Cost and earnings in excess of billings are classified as unbilled revenue while billing in excess of cost and earnings is classified as deferred revenue. Provision for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the current estimates. When the company receives advances for its services, such amounts are reflected as advance received from clients until all conditions for revenue recognition are met. The company presents revenues net of service taxes and value added taxes in its profit and loss account.

The company accounts for volume discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discount/incentive amount to each of the underlying revenue transactions that result in progress by the customer towards earning the discount/incentive. Also when the level of discount varies with increase in levels of revenue transactions, the company recognizes the liability based on its estimate of the customer’s future purchases if it is probable that the criteria for the discount will not be met, or if the amount thereof cannot be estimated reliably. The company recognizes changes in the estimated amount of obligation for discount using cumulative catch-up approach. The discounts are passed on the customer either as direct payments or as a reduction of payments due from customer.

Profit on sale of investment is recorded on the transfer of title from the company and is determined as the difference between the sale price and the carrying value of the investment. Interest on deployment of surplus funds is recognised using time proportion method, based on underlying interest rates. Dividend income is recognized when the company’s right to receive dividend is established.

1.4 Expenditure

The cost of software user licenses purchased for rendering business process management services is charged to revenue when put to use. Lease under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets acquired are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognised as an expense on a straight line basis in the profit and loss account over the lease term.

1.5 Fixed assets, intangible assets and capital work-in-progress

Fixed assets are stated at cost, after reducing accumulated depreciation and impairment upto the date of the balance sheet. Direct costs are capitalized until the assets are ready for use and include financing costs relating to any borrowing attributable to acquisition or construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use. Capital work-in-progress includes the cost of fixed assets that are not yet ready for their intended use before the balance sheet date. Intangible assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortisation and impairment. Goodwill on amalgamation is tested periodically for impairment.

1.6 Depreciation

Depreciation on fixed assets is determined using the straight-line method based on useful lives of assets as estimated by the company. Depreciation for assets purchased/sold during the period is proportionately charged. Individual assets costing ₹5,000 or less are depreciated within a year of acquisition. Leasehold improvements are written off over the lower of the lease term or the useful life of the asset. Leasehold land is amortised over the lease period. Intangible assets are amortised over their useful life on a straight line basis commencing from the date the asset is available to the company for its use. Management estimates the useful lives for the various fixed assets as follows:

Building	Fifteen years
Computer equipment	Two years
Office equipment	Five years
Furniture and fixtures	Five years

1.7 Foreign currency transactions

Revenue from overseas clients and collections deposited in bank accounts are recorded at the exchange rate as of the date of the respective transactions. Expenditure in foreign currency is accounted at the exchange rate prevalent when such expenditure is incurred. Disbursements made out of bank accounts are reported at a rate that approximates the actual monthly rate. Exchange differences are recorded when the amount actually received on sales or actually paid when expenditure is incurred is converted into Indian rupees. The exchange differences arising on foreign currency transactions are recognized as income or expense in the period in which they arise. Monetary assets and monetary liabilities denominated in foreign currency are translated at the exchange rate prevalent at the date of the balance sheet. The resulting difference is also recorded in the profit and loss account. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

1.8 Forward contracts and option contracts in foreign currencies

The company uses forward contracts and options contracts to hedge its exposure to movements in foreign exchange rates. The use of these forward contracts and option contracts reduces the risk or cost to the company and the company does not use the forward contracts and option contracts for trading or speculation purposes.

Effective April 1,2008 the Company adopted Accounting Standard AS 30 " Financial Instruments: Recognition and Measurement", to the extent that the adoption does not conflict with existing mandatory accounting standards and other authoritative pronouncements, Company law and other regulatory requirements.

Forward and options contracts are fair valued at each reporting date. The company records the mark to market gain or loss on effective hedges in the foreign currency fluctuation reserve until the transactions are complete. On completion, the gain or loss is transferred to the profit and loss account of that period. To designate a forward contract or option contracts as an effective hedge, management objectively evaluates and evidences with appropriate supporting documents at the inception of each contract whether the contract is effective in achieving offsetting cash flows attributable to the hedged risk. In the absence of a designation as an effective hedge, a gain or loss is recognized in the profit and loss account. Currently the hedges undertaken by the company are all ineffective in nature and the resultant gain or loss consequent to fair valuation is recognised in the profit and loss account at each reporting date.

1.9 Income tax

Income taxes are computed using the tax effect accounting method, where taxes are accrued in the same period the related revenue and expenses arise. A provision is made for income tax for the period based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable.

The differences that result between the profit considered for income taxes and the profit as per the financial statements are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the differences that originate in one accounting period and reverse in another, based on the tax effect of the aggregate amount being considered. The tax effect is calculated on the accumulated timing differences at the end of an accounting period based on prevailing enacted or substantively enacted regulations. Deferred tax assets in situation of unabsorbed depreciation and carry forward business losses exist, are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets, other than in situation of unabsorbed depreciation and carry forward business losses are recognized only if there is reasonable certainty that they will be realized. Deferred tax assets are reviewed for the appropriateness of their respective carrying values at each balance sheet date. The income tax provision for the period is made based on the best estimate of the annual average tax rate expected to be applicable for the full fiscal year.

1.10 Provisions and contingent liability

The company recognises a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a present obligation that cannot be estimated reliably or a possible or present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are made for all known losses and liabilities and future unforeseeable factors that may affect the profit on fixed-price business process management contracts.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event based on a reliable estimate of such obligation.

1.11 Impairment of assets

Management periodically assesses using, external and internal sources, whether there is an indication that an asset (including goodwill) may be impaired. An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use i.e. the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

1.12 Earnings per share

In determining earnings per share, the company considers the net profit after tax. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the year. Diluted earnings per share are computed using the weighted average number of basic and dilutive common equivalent shares outstanding during the year, except where the result would be anti-dilutive. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date.

1.13 Employee Benefits

Compensated absences

The employees of the Company are entitled to compensated absences which are both accumulating and non-accumulating in nature. The expected cost of accumulating compensated absences is determined by an actuarial valuation based on the additional amount expected to be paid as a result of the unused entitlement that has accumulated at the Balance Sheet date. Expense on non-accumulating compensated absences is recognised in the period in which the absences occur.

1.14 Cash and Cash Equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

	70,96,33,301	**51,41,85,838**

*Includes dues from subsidiary companies (refer to note 2.16)

Provision for doubtful debts

Periodically, the Company evaluates all customer dues to the Company for collectability. The need for provisions is assessed based on various factors including collectability of specific dues, risk perceptions of the industry in which the customer operates, general economic factors, which could affect the customer's ability to settle. The Company normally provides for debtor dues outstanding for six months or longer as at the Balance Sheet date.

2.17 Segment reporting

The company's operations primarily relate to providing business process management services to organizations that outsource their business processes. Accordingly, revenues represented along industry classes comprise the primary basis of segmental information set out in these financial statements. Secondary segmental reporting is performed on the basis of the geographical location of customers.

The accounting principles consistently used in the preparation of the financial statements are also consistently applied to record income in individual segments. These are set out in the note on significant accounting policies.

Industry segments at the company primarily comprise customers relating to financial services and insurance (FSI), manufacturing (MFG), enterprises in energy, utlilites and telecommunication services (ECS) and retail, logistics, consumer product group, life sciences and health care enterprises (RCL).Revenue and identifiable operating expenses in relation to segments is categorized based on items that are individually identified to those segments while allocated expenditure is categorized in relation to the associated turnover of the segment. Expenses which form a significant component of total expenses are not specifically allocable to specific segments as the underlying services are used interchangeably. These expenses are separately disclosed as "unallocated" and adjusted only against the total income of the company. The company believes that it is not practical to provide segment disclosures relating to these costs and expenses, and accordingly these expenses are separately disclosed as unallocated and directly charged against total income. Fixed assets or liabilities contracted have not been identified to any reportable segments, as these are used interchangeably between segments. Accordingly no disclosure relating to total segment assets and liabilites are made.

Geographical segments are segregated based on the location of the customers, or in relation to which the revenue is otherwise recognized.

All direct costs are identified to its respective verticals/geographies on the basis of revenues from the respective verticals/geographies while unallocable cost consists of depreciation only.

To

The Members of Infosys BPO s.r.o

Report on the Financial Statements:

We have audited the accompanying financial statement of **Infosys BPO s.r.o** (`the Company`) as at 31st, March 2013, the profit and loss account(`Financial Statement`) of the Company for the year ended on that date and a summary of significant accounting policies and other explanatory information.

Management`s Responsibility for the Financial Statements:

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position and financial performance of the Company in accordance with the Accounting Standards referred to in Sub-Section (3C) of Section 211 of the Companies Act, 1956(``the Act``) This responsibility included the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor`s Responsibility:

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit.

Opinion:

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

1) In the case of the balance sheet, of the state of affairs of the Company as at 31st March 2013;
2) In the case of the statement of profit and loss, of the ***Loss*** for the year ended on that date;

As required by Section 227(3) of the Act, we report that;

a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
b) In our opinion proper books of account as required by law have been kept by the company so far as appears from our examination of those books;
c) The Balance Sheet and statement of profit and loss account dealt with by this Report are in agreement with the books of accounts;
d) In our opinion, the Balance Sheet and statement of profit and loss account comply with the Accounting Standards referred to in Subsection (3C) of Section 211 of the Companies Act, 1956, and;

Schedules to the financial statements for the year ended March 31,2013

Significant accounting policies and notes on accounts

Company overview

Infosys BPO s.r.o is a leading provider of business process management services to organizations that outsource their business processes. Infosys BPO s.r.o is a majority owned and controlled subsidiary of Infosys BPO Limited. The company leverages the benefits of service delivery globalization, process redesign and technology and thus drives efficiency and cost effectiveness into client's business processes and thereby improve their competitive position by managing their business processes in addition to providing increased value.

1 Significant accounting policies

1.1 Basis of preparation of financial statements

These financial statements are prepared under the historical cost convention, in accordance with Generally Accepted Accounting Principles in India ("GAAP") on accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises accounting standards as specified in rule 3 of the Companies (Accounting Standards) Rules 2006, and the relevant provisions of the Companies Act, 1956 to the extent applicable. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

1.2 Use of estimates

The preparation of the financial statements in conformity with GAAP requires that the management of the company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as of the date of the financial statements. Examples of such estimates includes computation of percentage of completion which requires the company to estimate the efforts expended to date as a proportion of the total efforts to be expended, provision for doubtful debts, future obligations under employee retirement benefit plans, provision for income taxes, provision for SLA and the useful lives of fixed assets and intangible assets.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

1.3 Revenue recognition

The company derives its revenues primarily from business process management services, on time-and-material, fixed-price, fixed-time frame and unit-price basis. Revenue on time-and-material contracts is recognized as the related services are rendered and revenue from the end of the last billing to the balance sheet date is recognised as unbilled revenues. Revenue from fixed-price, fixed-time frame contracts, where there is no uncertainity as to measurement and collectibility of consideration, is recognized as per the percentage of completion method. When there is uncertainty as to measurement or ultimate collectability revenue recognition is postponed until such uncertainty is resolved. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Cost and earnings in excess of billings are classified as unbilled revenue while billing in excess of cost and earnings is classified as deferred revenue. Provision for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the current estimates. When the company receives advances for its services, such amounts are reflected as advance received from clients until all conditions for revenue recognition are met. The company presents revenues net of service taxes and value added taxes in its profit and loss account.

The company accounts for volume discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discount/incentive amount to each of the underlying revenue transactions that result in progress by the customer towards earning the discount/incentive. Also when the level of discount varies with increase in levels of revenue transactions, the company recognizes the liability based on its estimate of the customer’s future purchases if it is probable that the criteria for the discount will not be met, or if the amount thereof cannot be estimated reliably. The company recognizes changes in the estimated amount of obligation for discount using cumulative catch-up approach. The discounts are passed on the customer either as direct payments or as a reduction of payments due from customer.

Profit on sale of investment is recorded on the transfer of title from the company and is determined as the difference between the sale price and the carrying value of the investment. Interest on deployment of surplus funds is recognised using time proportion method, based on underlying interest rates. Dividend income is recognized when the company’s right to receive dividend is established.

1.4 Expenditure

The cost of software user licenses purchased for rendering business process management services is charged to revenue when put to use. Lease under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets acquired are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognised as an expense on a straight line basis in the profit and loss account over the lease term.

1.5 Fixed assets, intangible assets and capital work-in-progress

Fixed assets are stated at cost, after reducing accumulated depreciation and impairment upto the date of the balance sheet. Direct costs are capitalized until the assets are ready for use and include financing costs relating to any borrowing attributable to acquisition or construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use. Capital work-in-progress includes the cost of fixed assets that are not yet ready for their intended use before the balance sheet date. Intangible assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortisation and impairment. Goodwill on amalgamation is tested periodically for impairment.

1.6 Depreciation

Depreciation on fixed assets is determined using the straight-line method based on useful lives of assets as estimated by the company. Depreciation for assets purchased/sold during the period is proportionately charged. Individual assets costing ₹5,000 or less are depreciated within a year of acquisition. Leasehold improvements are written off over the lower of the lease term or the useful life of the asset. Leasehold land is amortised over the lease period. Intangible assets are amortised over their useful life on a straight line basis commencing from the date the asset is available to the company for its use. Management estimates the useful lives for the various fixed assets as follows:

Building	Fifteen years
Computer equipment	Two years
Plant and machinery	Five years
Furniture and fixtures	Five years

1.7 Foreign currency transactions

Revenue from overseas clients and collections deposited in bank accounts are recorded at the exchange rate as of the date of the respective transactions. Expenditure in foreign currency is accounted at the exchange rate prevalent when such expenditure is incurred. Disbursements made out of bank accounts are reported at a rate that approximates the actual monthly rate. Exchange differences are recorded when the amount actually received on sales or actually paid when expenditure is incurred is converted into Indian rupees. The exchange differences arising on foreign currency transactions are recognized as income or expense in the period in which they arise. Monetary assets and monetary liabilities denominated in foreign currency are translated at the exchange rate prevalent at the date of the balance sheet. The resulting difference is also recorded in the profit and loss account. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

1.8 Forward contracts and option contracts in foreign currencies

The company uses forward contracts and options contracts to hedge its exposure to movements in foreign exchange rates. The use of these forward contracts and option contracts reduces the risk or cost to the company and the company does not use the forward contracts and option contracts for trading or speculation purposes.

Effective April 1,2008 the Company adopted Accounting Standard AS 30 " Financial Instruments: Recognition and Measurement", to the extent that the adoption does not conflict with existing mandatory accounting standards and other authoritative pronouncements, Company law and other regulatory requirements.

Forward and options contracts are fair valued at each reporting date. The company records the mark to market gain or loss on effective hedges in the foreign currency fluctuation reserve until the transactions are complete. On completion, the gain or loss is transferred to the profit and loss account of that period. To designate a forward contract or option contracts as an effective hedge, management objectively evaluates and evidences with appropriate supporting documents at the inception of each contract whether the contract is effective in achieving offsetting cash flows attributable to the hedged risk. In the absence of a designation as an effective hedge, a gain or loss is recognized in the profit and loss account. Currently the hedges undertaken by the company are all ineffective in nature and the resultant gain or loss consequent to fair valuation is recognised in the profit and loss account at each reporting date.

1.9 Income tax

Income taxes are computed using the tax effect accounting method, where taxes are accrued in the same period the related revenue and expenses arise. A provision is made for income tax for the period based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable.

The differences that result between the profit considered for income taxes and the profit as per the financial statements are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the differences that originate in one accounting period and reverse in another, based on the tax effect of the aggregate amount being considered. The tax effect is calculated on the accumulated timing differences at the end of an accounting period based on prevailing enacted or substantively enacted regulations. Deferred tax assets in situation of unabsorbed depreciation and carry forward business losses exist, are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets, other than in situation of unabsorbed depreciation and carry forward business losses are recognized only if there is reasonable certainty that they will be realized. Deferred tax assets are reviewed for the appropriateness of their respective carrying values at each balance sheet date. The income tax provision for the period is made based on the best estimate of the annual average tax rate expected to be applicable for the full fiscal year.

1.10 Provisions and contingent liability

The company recognises a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a present obligation that cannot be estimated reliably or a possible or present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are made for all known losses and liabilities and future unforeseeable factors that may affect the profit on fixed-price business process management contracts.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event based on a reliable estimate of such obligation.

1.11 Earnings per share

In determining earnings per share, the company considers the net profit after tax. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the year. Diluted earnings per share are computed using the weighted average number of basic and dilutive common equivalent shares outstanding during the year, except where the result would be anti-dilutive. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date.

1.12 Employee Benefits

Compensated absences

The employees of the Company are entitled to compensated absences which are both accumulating and non-accumulating in nature. The expected cost of accumulating compensated absences is determined by an actuarial valuation based on the additional amount expected to be paid as a result of the unused entitlement that has accumulated at the Balance Sheet date. Expense on non-accumulating compensated absences is recognised in the period in which the absences occur.

1.13 Impairment of assets

Management periodically assesses using, external and internal sources, whether there is an indication that an asset (including goodwill) may be impaired. An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset’s net selling price and value in use i.e. the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

1.14 Cash and Cash Equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash equivalents.

Provision for doubtful debts

Periodically, the Company evaluates all customer dues for collectability. The need for provision is assessed based on various factors including collectability of specific dues, risk perceptions of the industry in which the customer operates, general economic factors, which could affect the customer's ability to settle. The Company normally provides for debtor dues outstanding for six months or longer as at the Balance Sheet date. As at March 31, 2013 the Company has not provided for doubtful debts since there are no outstandings due from customers exceeding 180 days.

2.18 Segment reporting

The company's operations primarily relate to providing business process management services to organizations that outsource their business processes. Accordingly, revenues represented along industry classes comprise the primary basis of segmental information set out in these financial statements. Secondary segmental reporting is performed on the basis of the geographical location of customers.

The accounting principles consistently used in the preparation of the financial statements are also consistently applied to record income in individual segments. These are set out in the note on significant accounting policies.

Industry segments at the company primarily comprise customers relating to financial services and insurance (FSI), manufacturing (MFG), enterprises in energy, utlilites and telecommunication services (ECS) and retail, logistics, consumer product group, life sciences and health care enterprises (RCL). Revenue and identifiable operating expenses in relation to segments is categorized based on items that are individually identified to those segments while allocated expenditure is categorized in relation to the associated turnover of the segment. Expenses which form a significant component of total expenses are not specifically allocable to specific segments as the underlying services are used interchangeably. These expenses are separately disclosed as "unallocated" and adjusted only against the total income of the company. The company believes that it is not practical to provide segment disclosures relating to these costs and expenses, and accordingly these expenses are separately disclosed as unallocated and directly charged against total income. Fixed assets or liabilities contracted have not been identified to any reportable segments, as these are used interchangeably between segments. Accordingly no disclosure relating to total segment assets and liabilites are made.

Geographical segments are segregated based on the location of the customers, or in relation to which the revenue is otherwise recognized.

All direct costs are identified to its respective verticals/geographies on the basis of revenues from the respective verticals/geographies while unallocable cost consists of depreciation only.

To

The Members of McCamishSystems, LLC

Report on the Financial Statements:

We have audited the accompanying financial statement of **McCamishSystems, LLC** (`the Company`) as at 31st, March 2013, the profit and loss account(`Financial Statement`) of the Company for the year ended on that date and a summary of significant accounting policies and other explanatory information.

Management`s Responsibility for the Financial Statements:

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position and financial performance of the Company in accordance with the Accounting Standards referred to in Sub-Section (3C) of Section 211 of the Companies Act, 1956(``the Act``) This responsibility included the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor`s Responsibility:

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit.

Opinion:

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

1) In the case of the balance sheet, of the state of affairs of the Company as at 31st March 2013;
2) In the case of the statement of profit and loss, of the ***Loss*** for the year ended on that date;

As required by Section 227(3) of the Act, we report that;

a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
b) In our opinion proper books of account as required by law have been kept by the company so far as appears from our examination of those books;
c) The Balance Sheet and statement of profit and loss account dealt with by this Report are in agreement with the books of accounts;
d) In our opinion, the Balance Sheet and statement of profit and loss account comply with the Accounting Standards referred to in Subsection (3C) of Section 211 of the Companies Act, 1956, and;

Schedules to the financial statements for the year ended March 31, 2013

Significant accounting policies and notes on accounts

Company overview

McCamish Systems LLC is a leading provider of business process management services to organizations that outsource their business processes. McCamish Systems LLC is a wholly owned and controlled entity of Infosys BPO Limited. The company leverages the benefits of service delivery globalization, process redesign and technology and thus drives efficiency and cost effectiveness into client's business processes and thereby improve their competitive position by managing their business processes in addition to providing increased value.

1 Significant accounting policies

1.1 Basis of preparation of financial statements

These financial statements are prepared under the historical cost convention, in accordance with Generally Accepted Accounting Principles in India ("GAAP") on accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises accounting standards as specified in rule 3 of the Companies (Accounting Standards) Rules 2006, and the relevant provisions of the Companies Act, 1956 to the extent applicable. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

1.2 Use of estimates

The preparation of the financial statements in conformity with GAAP requires that the management of the company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as of the date of the financial statements. Examples of such estimates includes computation of percentage of completion which requires the company to estimate the efforts expended to date as a proportion of the total efforts to be expended, provision for doubtful debts, future obligations under employee retirement benefit plans, provision for income taxes, provision for SLA and the useful lives of fixed assets and intangible assets.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

1.3 Revenue recognition

The company derives its revenues primarily from business process management services, on time-and-material, fixed-price, fixed-time frame and unit-price basis. Revenue on time-and-material contracts is recognized as the related services are rendered and revenue from the end of the last billing to the balance sheet date is recognised as unbilled revenues. Revenue from fixed-price, fixed-time frame contracts, where there is no uncertainity as to measurement and collectibility of consideration, is recognized as per the percentage of completion method. When there is uncertainty as to measurement or ultimate collectability revenue recognition is postponed until such uncertainty is resolved. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Cost and earnings in excess of billings are classified as unbilled revenue while billing in excess of cost and earnings is classified as deferred revenue. Provision for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the current estimates. When the company receives advances for its services, such amounts are reflected as advance received from clients until all conditions for revenue recognition are met. The company presents revenues net of service taxes and value added taxes in its profit and loss account.

The company accounts for volume discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discount/incentive amount to each of the underlying revenue transactions that result in progress by the customer towards earning the discount/incentive. Also when the level of discount varies with increase in levels of revenue transactions, the company recognizes the liability based on its estimate of the customer’s future purchases if it is probable that the criteria for the discount will not be met, or if the amount thereof cannot be estimated reliably. The company recognizes changes in the estimated amount of obligation for discount using cumulative catch-up approach. The discounts are passed on the customer either as direct payments or as a reduction of payments due from customer.

Profit on sale of investment is recorded on the transfer of title from the company and is determined as the difference between the sale price and the carrying value of the investment. Interest on deployment of surplus funds is recognised using time proportion method, based on underlying interest rates. Dividend income is recognized when the company’s right to receive dividend is established.

1.4 Expenditure

The cost of software user licenses purchased for rendering business process management services is charged to revenue when put to use. Lease under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets acquired are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognised as an expense on a straight line basis in the profit and loss account over the lease term.

1.5 Fixed assets, intangible assets and capital work-in-progress

Fixed assets are stated at cost, after reducing accumulated depreciation and impairment upto the date of the balance sheet. Direct costs are capitalized until the assets are ready for use and include financing costs relating to any borrowing attributable to acquisition or construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use. Capital work-in-progress includes the cost of fixed assets that are not yet ready for their intended use before the balance sheet date. Intangible assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortisation and impairment. Goodwill on amalgamation is tested periodically for impairment.

1.6 Depreciation

Depreciation on fixed assets is determined using the straight-line method based on useful lives of assets as estimated by the company. Depreciation for assets purchased/sold during the period is proportionately charged. Individual assets costing ₹5,000 or less are depreciated within a year of acquisition. Leasehold improvements are written off over the lower of the lease term or the useful life of the asset. Leasehold land is amortised over the lease period. Intangible assets are amortised over their useful life on a straight line basis commencing from the date the asset is available to the company for its use. Management estimates the useful lives for the various fixed assets as follows:

Building	Fifteen years
Computer equipment	Two years
Office equipment	Five years
Furniture and fixtures	Five years

1.7 Foreign currency transactions

Revenue from overseas clients and collections deposited in bank accounts are recorded at the exchange rate as of the date of the respective transactions. Expenditure in foreign currency is accounted at the exchange rate prevalent when such expenditure is incurred. Disbursements made out of bank accounts are reported at a rate that approximates the actual monthly rate. Exchange differences are recorded when the amount actually received on sales or actually paid when expenditure is incurred is converted into Indian rupees. The exchange differences arising on foreign currency transactions are recognized as income or expense in the period in which they arise. Monetary assets and monetary liabilities denominated in foreign currency are translated at the exchange rate prevalent at the date of the balance sheet. The resulting difference is also recorded in the profit and loss account. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

1.8 Impairment of assets

Management periodically assesses using, external and internal sources, whether there is an indication that an asset (including goodwill) may be impaired. An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use i.e. the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

1.9 Employee Benefits

Compensated absences

The employees of the Company are entitled to compensated absences which are both accumulating and non-accumulating in nature. The expected cost of accumulating compensated absences is determined by an actuarial valuation based on the additional amount expected to be paid as a result of the unused entitlement that has accumulated at the Balance Sheet date. Expense on non-accumulating compensated absences is recognised in the period in which the absences occur.

1.10 Income tax

Income taxes are computed using the tax effect accounting method, where taxes are accrued in the same period the related revenue and expenses arise. A provision is made for income tax for the period based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable.

The differences that result between the profit considered for income taxes and the profit as per the financial statements are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the differences that originate in one accounting period and reverse in another, based on the tax effect of the aggregate amount being considered. The tax effect is calculated on the accumulated timing differences at the end of an accounting period based on prevailing enacted or substantively enacted regulations. Deferred tax assets in situation of unabsorbed depreciation and carry forward business losses exist, are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets, other than in situation of unabsorbed depreciation and carry forward business losses are recognized only if there is reasonable certainty that they will be realized. Deferred tax assets are reviewed for the appropriateness of their respective carrying values at each balance sheet date. The income tax provision for the period is made based on the best estimate of the annual average tax rate expected to be applicable for the full fiscal year.

1.11 Provisions and contingent liability

The company recognises a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a present obligation that cannot be estimated reliably or a possible or present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are made for all known losses and liabilities and future unforeseeable factors that may affect the profit on fixed-price business process management contracts.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event based on a reliable estimate of such obligation.

1.12 Earnings per share

In determining earnings per share, the company considers the net profit after tax. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the year. Diluted earnings per share are computed using the weighted average number of basic and dilutive common equivalent shares outstanding during the year, except where the result would be anti-dilutive. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date.

1.13 Cash and Cash Equivalents

Cash and cash equivalents comprise cash and cash on deposit with banks and corporations. The company considers all highly liquid investments with a remaining maturity at the date of purchase of three months or less and that are readily convertible to known amounts of cash to be cash

NOTES ON ACCOUNTS FOR THE YEAR ENDED MARCH 31, 2013

* Wholly owned subsidiaries of Infosys Limited

** Wholly owned subsidiaries of Infosys BPO Limited. During the year ended March 31, 2011 Infosys BPO (Thailand) Limited was liquidated.

On December 4, 2009, Infosys BPO acquired 100% of the voting interests in McCamish Systems LLC (McCamish), a business process solutions provider based in Atlanta, Georgia, in the United States. The business acquisition was conducted by entering into Membership Interest Purchase Agreement for a cash consideration of ₹ 171 crore and a contingent consideration of ₹ 67 crore. The acquisition was completed during the year and accounted as a business combination which resulted in goodwill of ₹ 227 crore.

The details of the related party transactions entered into by the Company, for the year ended March 31, 2013 and March 31, 2012 are as follows:

2.16 Segment reporting

The company's operations primarily relate to providing business process management services to organizations that outsource their business processes. Accordingly, revenues represented along industry classes comprise the primary basis of segmental information set out in these financial statements. Secondary segmental reporting is performed on the basis of the geographical location of customers.

The accounting principles consistently used in the preparation of the financial statements are also consistently applied to record income in individual segments. These are set out in the note on significant accounting policies.

Industry segments at the company primarily comprise customers relating to financial services and insurance (FSI), manufacturing (MFG), enterprises in energy, utlilites and telecommunication services (ECS) and retail, logistics, consumer product group, life sciences and health care enterprises (RCL). Revenue and identifiable operating expenses in relation to segments is categorized based on items that are individually identified to those segments while allocated expenditure is categorized in relation to the associated turnover of the segment. Expenses which form a significant component of total expenses are not specifically allocable to specific segments as the underlying services are used interchangeably. These expenses are separately disclosed as "unallocated" and adjusted only against the total income of the company. The company believes that it is not practical to provide segment disclosures relating to these costs and expenses, and accordingly these expenses are separately disclosed as unallocated and directly charged against total income. Fixed assets or liabilities contracted have not been identified to any reportable segments, as these are used interchangeably between segments. Accordingly no disclosure relating to total segment assets and liabilites are made.

Geographical segments are segregated based on the location of the customers, or in relation to which the revenue is otherwise recognized.
All direct costs are identified to its respective verticals/geographies on the basis of revenues from the respective verticals/geographies while unallocable cost consists of depreciation only.

To

The Members of Portland Group Pty Limited

Report on the Financial Statements:

We have audited the accompanying financial statement of **Portland Group Pty Limited** (`the Company`) as at 31st, March 2013, the profit and loss account(`Financial Statement`) of the Company for the year ended on that date and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements:

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position and financial performance of the Company in accordance with the Accounting Standards referred to in Sub-Section (3C) of Section 211 of the Companies Act, 1956(``the Act``) This responsibility included the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility:

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit.

Opinion:

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

1) In the case of the balance sheet, of the state of affairs of the Company as at 31st March 2013;
2) In the case of the statement of profit and loss, of the ***Loss*** for the year ended on that date;

As required by Section 227(3) of the Act, we report that;

a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
b) In our opinion proper books of account as required by law have been kept by the company so far as appears from our examination of those books;
c) The Balance Sheet and statement of profit and loss account dealt with by this Report are in agreement with the books of accounts;
d) In our opinion, the Balance Sheet and statement of profit and loss account comply with the Accounting Standards referred to in Subsection (3C) of Section 211 of the Companies Act, 1956, and;

April 12, 2013

Schedules to the financial statements for the year ended March 31, 2013

Significant accounting policies and notes on accounts

Company overview

Portland Group Pty Ltd is a strategic sourcing and category management services provider. Portland Group Pty Ltd is a wholly owned and controlled entity of Infosys BPO Limited. The company leverages the benefits of service delivery globalization, process redesign and technology and thus drives efficiency and cost effectiveness into client's business processes and thereby improve their competitive position by managing their business processes in addition to providing increased value.

1 Significant accounting policies

1.1 Basis of preparation of financial statements

These financial statements are prepared under the historical cost convention, in accordance with Generally Accepted Accounting Principles in India ("GAAP") on accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises accounting standards as specified in rule 3 of the Companies (Accounting Standards) Rules 2006, and the relevant provisions of the Companies Act, 1956 to the extent applicable. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

1.2 Use of estimates

The preparation of the financial statements in conformity with GAAP requires that the management of the company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as of the date of the financial statements. Examples of such estimates includes computation of percentage of completion which requires the company to estimate the efforts expended to date as a proportion of the total efforts to be expended, provision for doubtful debts, future obligations under employee retirement benefit plans, provision for income taxes, provision for SLA and the useful lives of fixed assets and intangible assets.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

1.3 Revenue recognition

The company derives its revenues primarily from strategic sourcing and category management services, on time-and-material, fixed-price, fixed-time frame and unit-price basis. Revenue on time-and-material contracts is recognized as the related services are rendered and revenue from the end of the last billing to the balance sheet date is recognised as unbilled revenues. Revenue from fixed-price, fixed-time frame contracts, where there is no uncertainity as to measurement and collectibility of consideration, is recognized as per the percentage of completion method. When there is uncertainty as to measurement or ultimate collectability revenue recognition is postponed until such uncertainty is resolved. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Cost and earnings in excess of billings are classified as unbilled revenue while billing in excess of cost and earnings is classified as deferred revenue. Provision for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the current estimates. When the company receives advances for its services, such amounts are reflected as advance received from clients until all conditions for revenue recognition are met. The company presents revenues net of service taxes and value added taxes in its profit and loss account.

The company accounts for volume discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discount/incentive amount to each of the underlying revenue transactions that result in progress by the customer towards earning the discount/incentive. Also when the level of discount varies with increase in levels of revenue transactions, the company recognizes the liability based on its estimate of the customer's future purchases if it is probable that the criteria for the discount will not be met, or if the amount thereof cannot be estimated reliably. The company recognizes changes in the estimated amount of obligation for discount using cumulative catch-up approach. The discounts are passed on the customer either as direct payments or as a reduction of payments due from customer.

Profit on sale of investment is recorded on the transfer of title from the company and is determined as the difference between the sale price and the carrying value of the investment. Interest on deployment of surplus funds is recognised using time proportion method, based on underlying interest rates. Dividend income is recognized when the company's right to receive dividend is established.

1.4 Expenditure

The cost of software user licenses purchased for rendering business process management services is charged to revenue when put to use. Lease under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets acquired are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognised as an expense on a straight line basis in the profit and loss account over the lease term.

1.5 Fixed assets, intangible assets and capital work-in-progress

Fixed assets are stated at cost, after reducing accumulated depreciation and impairment upto the date of the balance sheet. Direct costs are capitalized until the assets are ready for use and include financing costs relating to any borrowing attributable to acquisition or construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use. Capital work-in-progress includes the cost of fixed assets that are not yet ready for their intended use before the balance sheet date. Intangible assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortisation and impairment. Goodwill on amalgamation is tested periodically for impairment.

1.6 Depreciation

Depreciation on fixed assets is determined using the straight-line method based on useful lives of assets as estimated by the company. Depreciation for assets purchased/sold during the period is proportionately charged. Individual assets costing ₹5,000 or less are depreciated within a year of acquisition. Leasehold improvements are written off over the lower of the lease term or the useful life of the asset. Leasehold land is amortised over the lease period. Intangible assets are amortised over their useful life on a straight line basis commencing from the date the asset is available to the company for its use. Management estimates the useful lives for the various fixed assets as follows:

Computer equipment	Two years
Office equipment	Five years
Furniture and fixtures	Five years

1.7 Foreign currency transactions

Revenue from overseas clients and collections deposited in bank accounts are recorded at the exchange rate as of the date of the respective transactions. Expenditure in foreign currency is accounted at the exchange rate prevalent when such expenditure is incurred. Disbursements made out of bank accounts are reported at a rate that approximates the actual monthly rate. Exchange differences are recorded when the amount actually received on sales or actually paid when expenditure is incurred is converted into Indian rupees. The exchange differences arising on foreign currency transactions are recognized as income or expense in the period in which they arise. Monetary assets and monetary liabilities denominated in foreign currency are translated at the exchange rate prevalent at the date of the balance sheet. The resulting difference is also recorded in the profit and loss account. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

1.8 Income tax

Income taxes are computed using the tax effect accounting method, where taxes are accrued in the same period the related revenue and expenses arise. A provision is made for income tax for the period based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable.

The differences that result between the profit considered for income taxes and the profit as per the financial statements are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the differences that originate in one accounting period and reverse in another, based on the tax effect of the aggregate amount being considered. The tax effect is calculated on the accumulated timing differences at the end of an accounting period based on prevailing enacted or substantively enacted regulations. Deferred tax assets in situation of unabsorbed depreciation and carry forward business losses exist, are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets, other than in situation of unabsorbed depreciation and carry forward business losses are recognized only if there is reasonable certainty that they will be realized. Deferred tax assets are reviewed for the appropriateness of their respective carrying values at each balance sheet date. The income tax provision for the interim period is made based on the best estimate of the annual average tax rate expected to be applicable for the full fiscal year.

1.9 Provisions and contingent liability

The company recognises a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a present obligation that cannot be estimated reliably or a possible or present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are made for all known losses and liabilities and future unforeseeable factors that may affect the profit on fixed-price business process management contracts.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event based on a reliable estimate of such obligation.

1.10 Impairment of assets

Management periodically assesses using, external and internal sources, whether there is an indication that an asset (including goodwill) may be impaired. An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use i.e. the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

Provision for doubtful debts

Periodically, the Company evaluates all customer dues to the Company for collectability. The need for provisions is assessed based on various factors including collectability of specific dues, risk perceptions of the industry in which the customer operates, general economic factors, which could affec the customer's ability to settle. The Company normally provides for debtor dues outstanding for six months or longer as at the Balance Sheet date.

2.17 Segment reporting

The company's operations primarily relate to providing business process management services to organizations that outsource their business processes. Accordingly, revenues represented along industry classes comprise the primary basis of segmental information set out in these financial statements. Secondary segmental reporting is performed on the basis of the geographical location of customers.

The accounting principles consistently used in the preparation of the financial statements are also consistently applied to record income in individual segments. These are set out in the note on significant accounting policies.

Industry segments at the company primarily comprise customers relating to financial services and insurance (FSI), manufacturing (MFG), enterprises in energy, utlilites and telecommunication services (ECS) and retail, logistics, consumer product group, life sciences and health care enterprises (RCL). Revenue and identifiable operating expenses in relation to segments is categorized based on items that are individually identified to those segments while allocated expenditure is categorized in relation to the associated turnover of the segment. Expenses which form a significant component of total expenses are not specifically allocable to specific segments as the underlying services are used interchangeably. These expenses are separately disclosed as "unallocated" and adjusted only against the total income of the company. The company believes that it is not practical to provide segment disclosures relating to these costs and expenses, and accordingly these expenses are separately disclosed as unallocated and directly charged against total income. Fixed assets or liabilities contracted have not been identified to any reportable segments, as these are used interchangeably between segments. Accordingly no disclosure relating to total segment assets and liabilites are made.

Geographical segments are segregated based on the location of the customers, or in relation to which the revenue is otherwise recognized.
All direct costs are identified to its respective verticals/geographies on the basis of revenues from the respective verticals/geographies while unallocable cost consists of depreciation only.

To

The Members of Portland Procurement Services Pty Limited

Report on the Financial Statements:

We have audited the accompanying financial statement of **Portland Procurement Services Pty Limited** (`the Company`) as at 31st, March 2013, the profit and loss account(`Financial Statement`) of the Company for the year ended on that date and a summary of significant accounting policies and other explanatory information.

Management`s Responsibility for the Financial Statements:

Management is responsible for the preparation of these financial statements that give a true and fair view of the financial position and financial performance of the Company in accordance with the Accounting Standards referred to in Sub-Section (3C) of Section 211 of the Companies Act, 1956(``the Act``) This responsibility included the design, implementation and maintenance of internal control relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

Auditor`s Responsibility:

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the standards on Auditing issued by the Institute of Chartered Accountants of India. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of the accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit.

Opinion:

In our opinion and to the best of our information and according to the explanations given to us, the financial statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India:

1) In the case of the balance sheet, of the state of affairs of the Company as at 31st March 2013;
2) In the case of the statement of profit and loss, of the ***profit*** for the year ended on that date;

As required by Section 227(3) of the Act, we report that;

a) We have obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit;
b) In our opinion proper books of account as required by law have been kept by the company so far as appears from our examination of those books;
c) The Balance Sheet and statement of profit and loss account dealt with by this Report are in agreement with the books of accounts;
d) In our opinion, the Balance Sheet and statement of profit and loss account comply with the Accounting Standards referred to in Subsection (3C) of Section 211 of the Companies Act, 1956, and;

Schedules to the financial statements for the quarter and year ended March 31, 2013

Significant accounting policies and notes on accounts

Company overview

Portland Procurement Services Pty Ltd is a strategic sourcing and category management services provider. Portland Procurement Services Pty Ltd is a wholly owned and controlled subsidiary of Portland Group Pty Ltd. The company leverages the benefits of service delivery globalization, process redesign and technology and thus drives efficiency and cost effectiveness into client's business processes and thereby improve their competitive position by managing their business processes in addition to providing increased value.

1 Significant accounting policies

1.1 Basis of preparation of financial statements

These financial statements are prepared under the historical cost convention, in accordance with Generally Accepted Accounting Principles in India ("GAAP") on accrual basis except for certain financial instruments which are measured at fair values. GAAP comprises accounting standards as specified in rule 3 of the Companies (Accounting Standards) Rules 2006, and the relevant provisions of the Companies Act, 1956 to the extent applicable. Accounting policies have been consistently applied except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

1.2 Use of estimates

The preparation of the financial statements in conformity with GAAP requires that the management of the company makes estimates and assumptions that affect the reported amounts of income and expenses of the period, reported balances of assets and liabilities and disclosures relating to contingent assets and liabilities as of the date of the financial statements. Examples of such estimates includes computation of percentage of completion which requires the company to estimate the efforts expended to date as a proportion of the total efforts to be expended, provision for doubtful debts, future obligations under employee retirement benefit plans, provision for income taxes, provision for SLA and the useful lives of fixed assets and intangible assets.

Accounting estimates could change from period to period. Actual results could differ from those estimates. Appropriate changes in estimates are made as the management becomes aware of changes in circumstances surrounding the estimates. Changes in estimates are reflected in the financial statements in the period in which changes are made and, if material, their effects are disclosed in the notes to the financial statements.

1.3 Revenue recognition

The company derives its revenues primarily from strategic sourcing and category management services, on time-and-material, fixed-price, fixed-time frame and unit-price basis. Revenue on time-and-material contracts is recognized as the related services are rendered and revenue from the end of the last billing to the balance sheet date is recognised as unbilled revenues. Revenue from fixed-price, fixed-time frame contracts, where there is no uncertainity as to measurement and collectibility of consideration, is recognized as per the percentage of completion method. When there is uncertainty as to measurement or ultimate collectability revenue recognition is postponed until such uncertainty is resolved. Revenues from unit-priced contracts are recognized as transactions are processed based on objective measures of output. Cost and earnings in excess of billings are classified as unbilled revenue while billing in excess of cost and earnings is classified as deferred revenue. Provision for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the current estimates. When the company receives advances for its services, such amounts are reflected as advance received from clients until all conditions for revenue recognition are met. The company presents revenues net of service taxes and value added taxes in its profit and loss account.

The company accounts for volume discounts and pricing incentives to customers as a reduction of revenue based on the ratable allocation of the discount/incentive amount to each of the underlying revenue transactions that result in progress by the customer towards earning the discount/incentive. Also when the level of discount varies with increase in levels of revenue transactions, the company recognizes the liability based on its estimate of the customer’s future purchases if it is probable that the criteria for the discount will not be met, or if the amount thereof cannot be estimated reliably. The company recognizes changes in the estimated amount of obligation for discount using cumulative catch-up approach. The discounts are passed on the customer either as direct payments or as a reduction of payments due from customer.

Profit on sale of investment is recorded on the transfer of title from the company and is determined as the difference between the sale price and the carrying value of the investment. Interest on deployment of surplus funds is recognised using time proportion method, based on underlying interest rates. Dividend income is recognized when the company’s right to receive dividend is established.

1.4 Expenditure

The cost of software user licenses purchased for rendering business process management services is charged to revenue when put to use. Lease under which the company assumes substantially all the risks and rewards of ownership are classified as finance leases. Such assets acquired are capitalized at fair value of the asset or present value of the minimum lease payments at the inception of the lease, whichever is lower. Lease payments under operating leases are recognised as an expense on a straight line basis in the profit and loss account over the lease term.

1.5 Fixed assets, intangible assets and capital work-in-progress

Fixed assets are stated at cost, after reducing accumulated depreciation and impairment upto the date of the balance sheet. Direct costs are capitalized until the assets are ready for use and include financing costs relating to any borrowing attributable to acquisition or construction of those fixed assets which necessarily take a substantial period of time to get ready for their intended use. Capital work-in-progress includes the cost of fixed assets that are not yet ready for their intended use before the balance sheet date. Intangible assets are recorded at the consideration paid for acquisition of such assets and are carried at cost less accumulated amortisation and impairment. Goodwill on amalgamation is tested periodically for impairment.

1.6 Depreciation

Depreciation on fixed assets is determined using the straight-line method based on useful lives of assets as estimated by the company. Depreciation for assets purchased/sold during the period is proportionately charged. Individual assets costing ₹5,000 or less are depreciated within a year of acquisition. Leasehold improvements are written off over the lower of the lease term or the useful life of the asset. Leasehold land is amortised over the lease period. Intangible assets are amortised over their useful life on a straight line basis commencing from the date the asset is available to the company for its use. Management estimates the useful lives for the various fixed assets as follows:

Computer equipment	Two years
Office equipment	Five years
Furniture and fixtures	Five years

1.7 Foreign currency transactions

Revenue from overseas clients and collections deposited in bank accounts are recorded at the exchange rate as of the date of the respective transactions. Expenditure in foreign currency is accounted at the exchange rate prevalent when such expenditure is incurred. Disbursements made out of bank accounts are reported at a rate that approximates the actual monthly rate. Exchange differences are recorded when the amount actually received on sales or actually paid when expenditure is incurred is converted into Indian rupees. The exchange differences arising on foreign currency transactions are recognized as income or expense in the period in which they arise. Monetary assets and monetary liabilities denominated in foreign currency are translated at the exchange rate prevalent at the date of the balance sheet. The resulting difference is also recorded in the profit and loss account. Non-monetary assets and non-monetary liabilities denominated in a foreign currency and measured at historical cost are translated at the exchange rate prevalent at the date of transaction.

1.8 Income tax

Income taxes are computed using the tax effect accounting method, where taxes are accrued in the same period the related revenue and expenses arise. A provision is made for income tax for the period based on the tax liability computed, after considering tax allowances and exemptions. Provisions are recorded when it is estimated that a liability due to disallowances or other matters is probable.

The differences that result between the profit considered for income taxes and the profit as per the financial statements are identified, and thereafter a deferred tax asset or deferred tax liability is recorded for timing differences, namely the differences that originate in one accounting period and reverse in another, based on the tax effect of the aggregate amount being considered. The tax effect is calculated on the accumulated timing differences at the end of an accounting period based on prevailing enacted or substantively enacted regulations. Deferred tax assets in situation of unabsorbed depreciation and carry forward business losses exist, are recognised only to the extent that there is virtual certainty that sufficient future taxable income will be available against which such deferred tax assets can be realised. Deferred tax assets, other than in situation of unabsorbed depreciation and carry forward business losses are recognized only if there is reasonable certainty that they will be realized. Deferred tax assets are reviewed for the appropriateness of their respective carrying values at each balance sheet date. The income tax provision for the interim period is made based on the best estimate of the annual average tax rate expected to be applicable for the full fiscal year.

1.9 Provisions and contingent liability

The company recognises a provision when there is a present obligation as a result of a past event that probably requires an outflow of resources and a reliable estimate can be made of the amount of the obligation. A disclosure for a contingent liability is made when there is a present obligation that cannot be estimated reliably or a possible or present obligation that may, but probably will not, require an outflow of resources. Where there is a possible obligation or a present obligation that the likelihood of outflow of resources is remote, no provision or disclosure is made. Provisions are made for all known losses and liabilities and future unforeseeable factors that may affect the profit on fixed-price business process management contracts.

Provisions for onerous contracts, i.e. contracts where the expected unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received under it, are recognised when it is probable that an outflow of resources embodying economic benefits will be required to settle a present obligation as a result of an obligating event based on a reliable estimate of such obligation.

1.10 Impairment of assets

Management periodically assesses using, external and internal sources, whether there is an indication that an asset (including goodwill) may be impaired. An impairment loss is recognised wherever the carrying value of an asset exceeds its recoverable amount. The recoverable amount is higher of the asset's net selling price and value in use i.e. the present value of future cash flows expected to arise from the continuing use of the asset and its eventual disposal. An impairment loss for an asset is reversed if there has been a change in the estimates used to determine the recoverable amount since the last impairment loss was recognized. The carrying amount of an asset is increased to its revised recoverable amount, provided that this amount does not exceed the carrying amount that would have been determined (net of any accumulated amortization or depreciation) had no impairment loss been recognized for the asset in prior years.

1.11 Earnings per share

In determining earnings per share, the company considers the net profit after tax. The number of shares used in computing basic earnings per share is the weighted average number of shares outstanding during the year. Diluted earnings per share are computed using the weighted average number of basic and dilutive common equivalent shares outstanding during the year, except where the result would be anti-dilutive. Dilutive potential equity shares are deemed converted as of the beginning of the period, unless they have been issued at a later date.

1.12 Employee Benefits

Compensated absences

The employees of the Company are entitled to compensated absences which are both accumulating and non-accumulating in nature. The expected cost of accumulating compensated absences is determined by an actuarial valuation based on the additional amount expected to be paid as a result of the unused entitlement that has accumulated at the Balance Sheet date. Expense on non-accumulating compensated absences is recognised in the period in which the absences occur.

2 NOTES ON ACCOUNTS FOR THE QUARTER AND YEAR ENDED MARCH 31, 2013

2.1 SHARE CAPITAL

2.14 Segment reporting

The company's operations primarily relate to providing business process management services to organizations that outsource their business processes. Accordingly, revenues represented along industry classes comprise the primary basis of segmental information set out in these financial statements. Secondary segmental reporting is performed on the basis of the geographical location of customers.

The accounting principles consistently used in the preparation of the financial statements are also consistently applied to record income in individual segments. These are set out in the note on significant accounting policies.

Industry segments at the company primarily comprise customers relating to financial services and insurance (FSI), manufacturing (MFG), enterprises in energy, utlilites and telecommunication services (ECS) and retail, logistics, consumer product group, life sciences and health care enterprises (RCL). Revenue and identifiable operating expenses in relation to segments is categorized based on items that are individually identified to those segments while allocated expenditure is categorized in relation to the associated turnover of the segment. Expenses which form a significant component of total expenses are not specifically allocable to specific segments as the underlying services are used interchangeably. These expenses are separately disclosed as "unallocated" and adjusted only against the total income of the company. The company believes that it is not practical to provide segment disclosures relating to these costs and expenses, and accordingly these expenses are separately disclosed as unallocated and directly charged against total income. Fixed assets or liabilities contracted have not been identified to any reportable segments, as these are used interchangeably between segments. Accordingly no disclosure relating to total segment assets and liabilites are made.

Geographical segments are segregated based on the location of the customers, or in relation to which the revenue is otherwise recognized.
All direct costs are identified to its respective verticals/geographies on the basis of revenues from the respective verticals/geographies while unallocable cost consists of depreciation only.
