

INFOSYS AGENTIC AI AUTHORING SOLUTION

Infosys[®]
Navigate your next

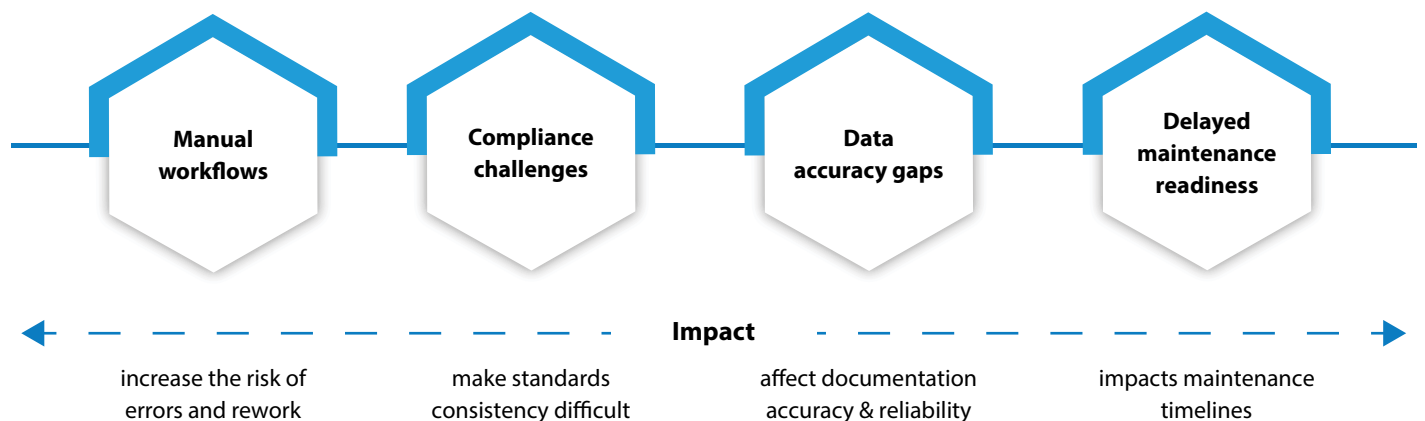

Rethink how technical documentation is authored, reviewed, and delivered.

Engineering changes never stop, and neither does the pressure to publish accurate and compliant technical publication documentation on time.

What if every engineering change could become publication-ready in a fraction of the time, driving up to **60% gains in authoring productivity**?

Read on to discover how **Infosys Agentic AI Authoring Solution** helps make it a reality.

What's Getting in the Way of Efficient Authoring?

Meet the Future of Technical Authoring

Intelligent Technical Authoring at Scale

For manufacturing organizations that handle technical publication change requests from multiple regions, manage surges in content volumes, and need to ensure that every textual update aligns with standards such as ASD-STE for consistent and compliant documentation, **Infosys Agentic AI Authoring Solution** is an agentic AI-powered solution that automates core authoring processes.

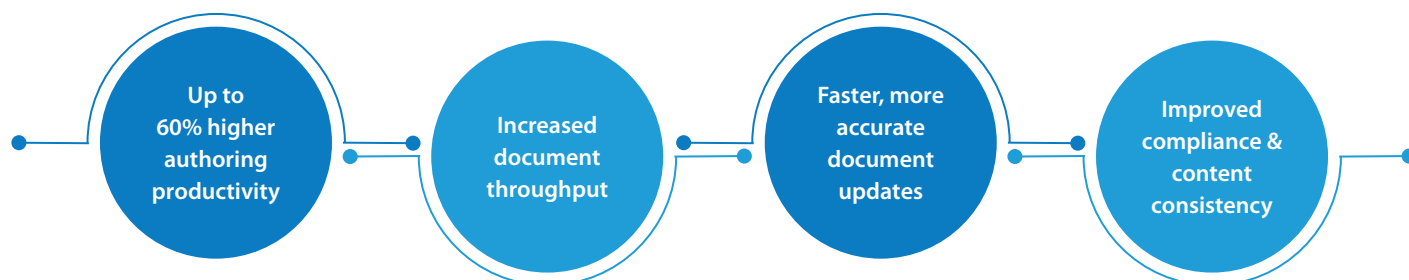

Accelerating Authoring Without Compromising Accuracy

Unlike traditional authoring process that relies on manual reviews and handoffs, Infosys solution enables **human-in-the-loop** oversight at critical stages—enabling authors and reviewers to evaluate the tool's recommendations, validate them, and make modifications, if required.

Built on Infosys **Topaz** platform, Infosys Agentic AI Authoring Solution is a **cloud-based, API-driven** solution that seamlessly integrates with enterprise content management systems.

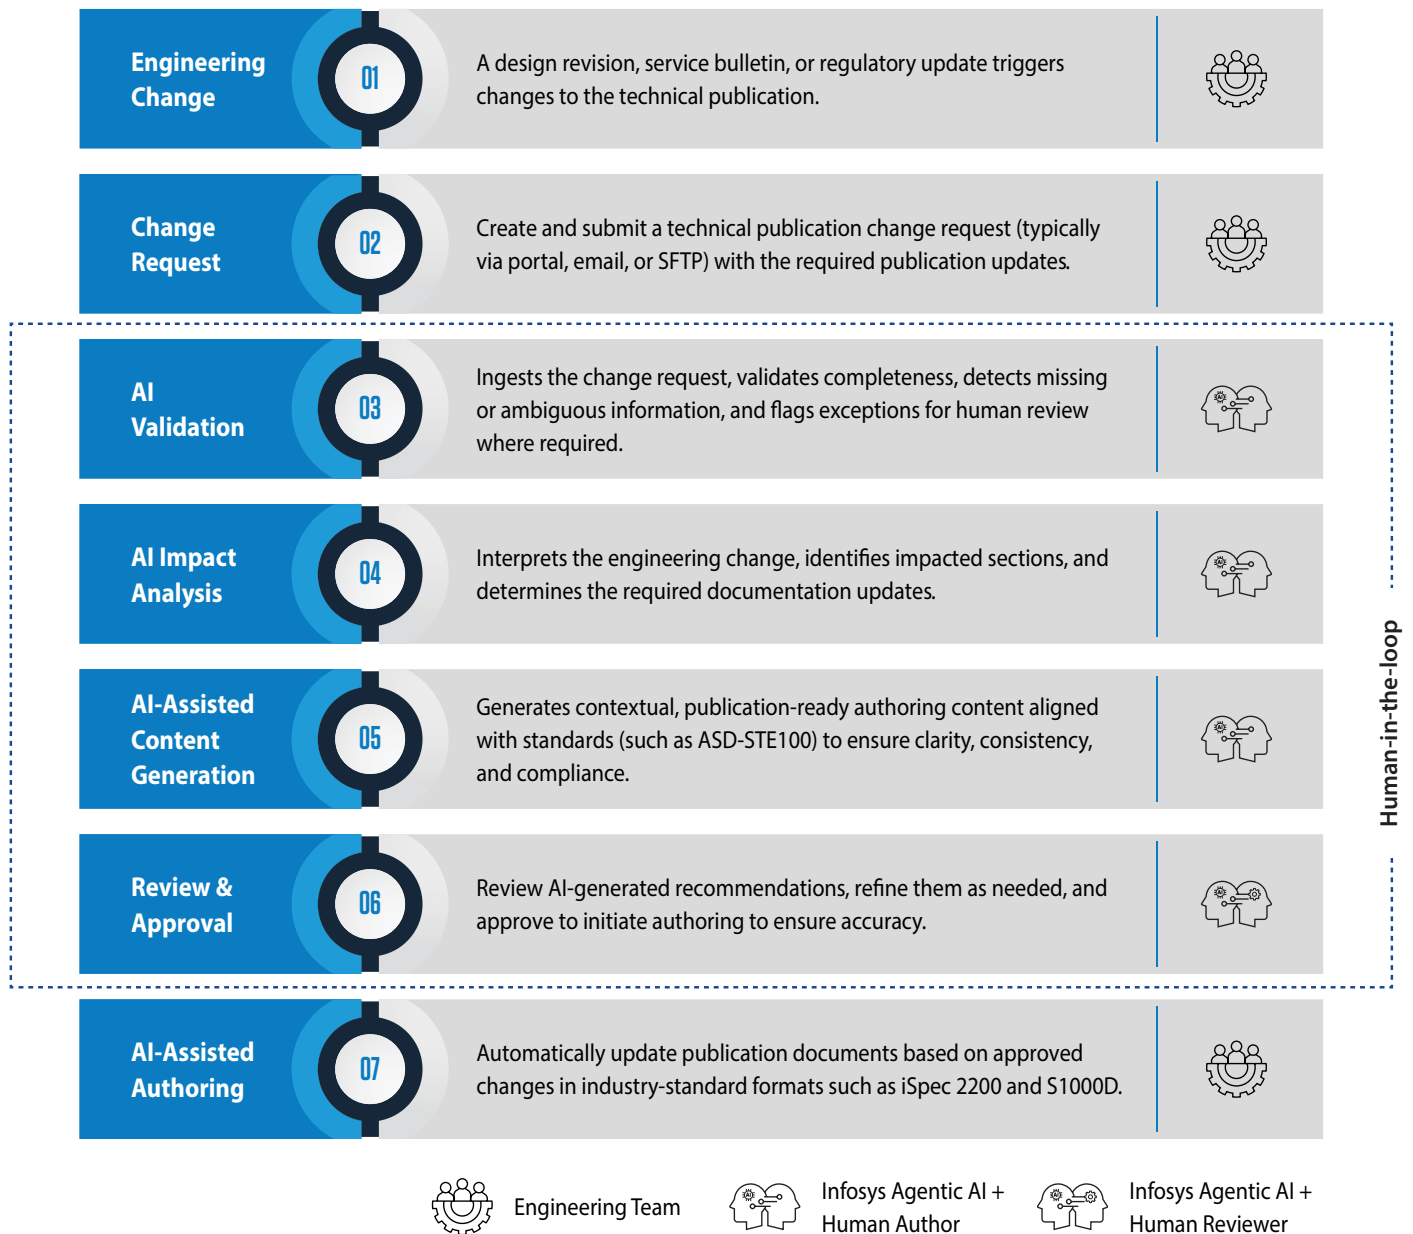

What Better Authoring Delivers

Purpose-Built for Technical Authoring

See where Infosys Agentic AI transforms the authoring workflow.

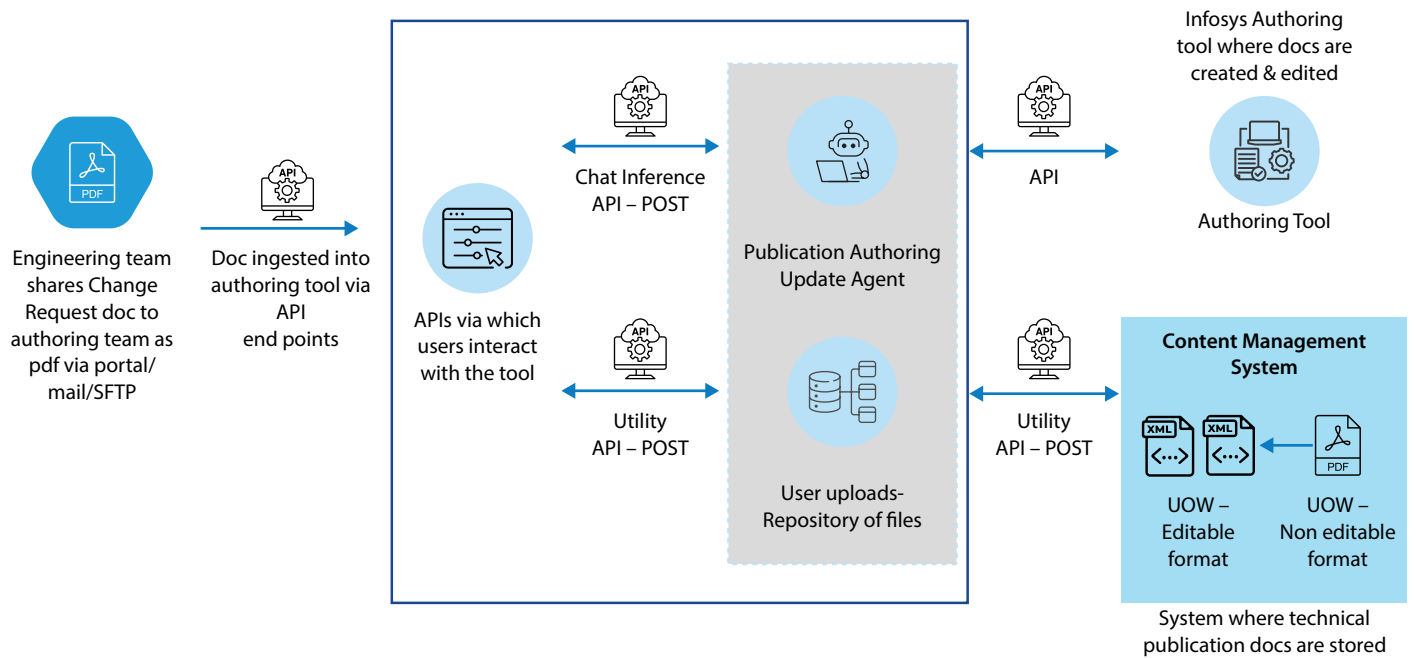

Purpose-built to automate the core authoring workflow (Steps 3–6) with agentic AI. Processes textual updates from engineering change requests; Illustrations are not modified.

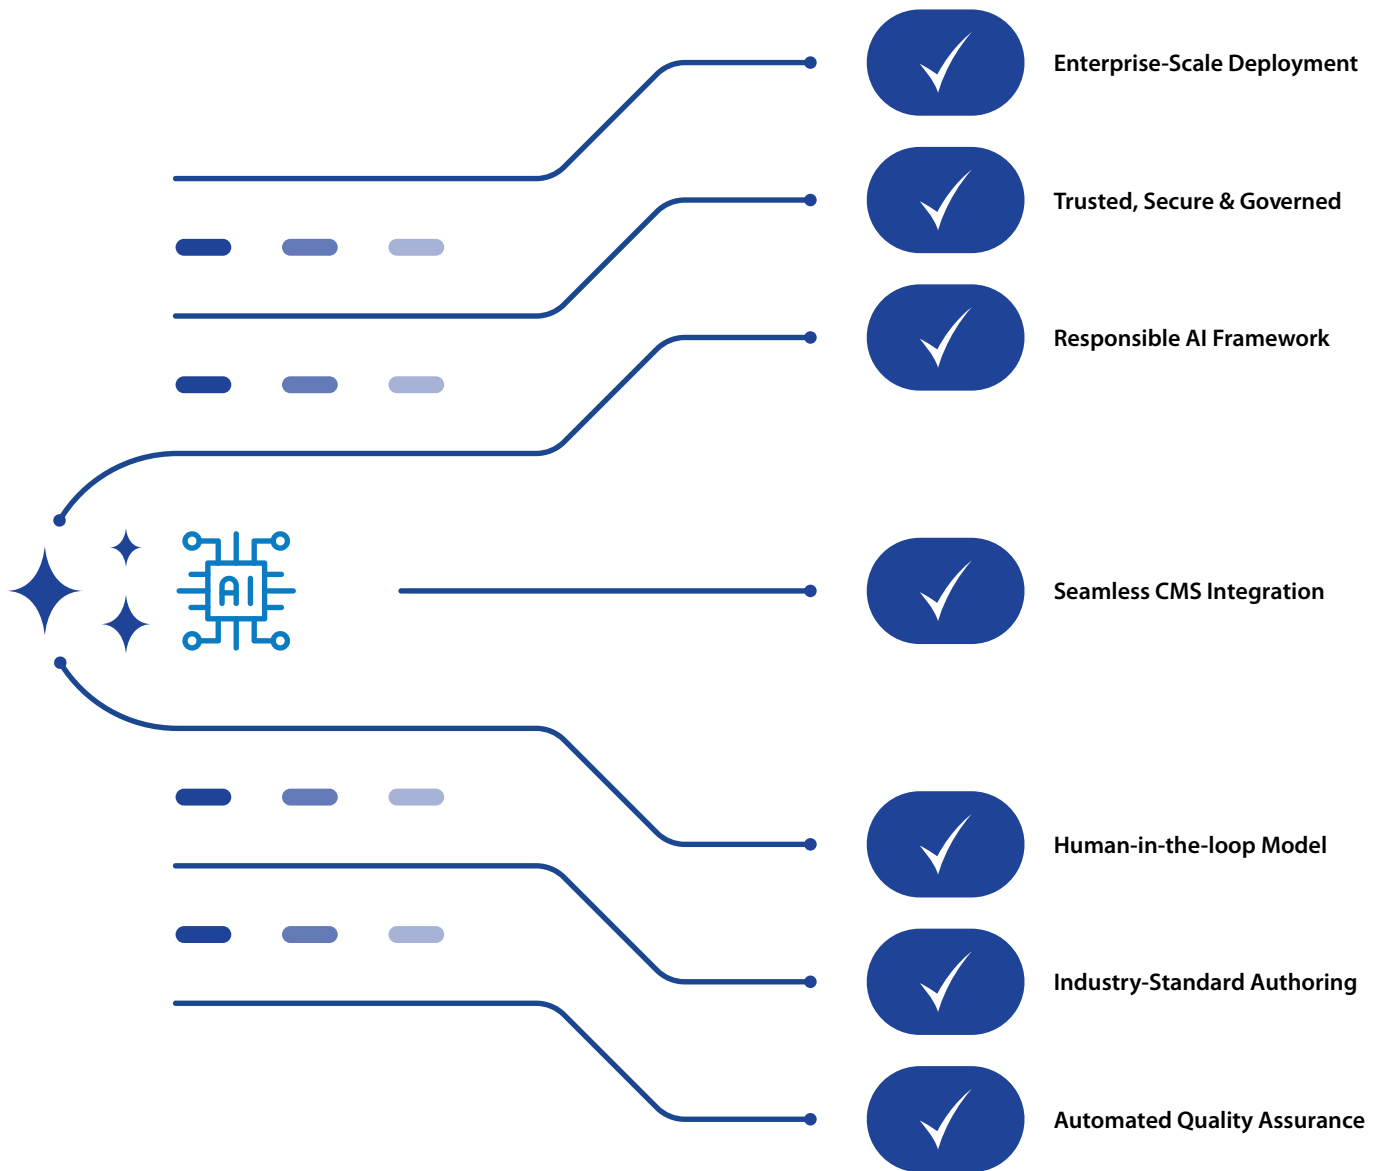

From Engineering Change to Publication... Intelligently

See smart authoring in action.

Agentic AI-Powered Technical Authoring Workflow

Enterprise-Ready by Design
